PROFILE

Applied AI & Analytics student at Nanyang Polytechnic with hands-on experience building full-stack, cloud-deployed and AI-assisted systems. Comfortable across machine learning, data analytics, React/Node.js/FastAPI development, Docker, Google Cloud, Firebase, OCR and LLM workflows. Seeking a one-year internship where I can contribute to real products, learn quickly and grow with an engineering team.

EDUCATION

Nanyang Polytechnic - Diploma in Applied AI & Analytics

2025 - Present

- Director's List, Academic Year 2025/26 Semester 2, for outstanding academic performance.
- Applied learning across machine learning, deep learning, data analytics, software engineering, cloud deployment, MLOps and database systems.
- NYP Cloud Computing Subcommittee - planning and publicity involvement supporting student technology activities.

TECHNICAL SKILLS

Programming & Web: Python, JavaScript, React, Node.js, FastAPI, .NET, Tailwind CSS, REST APIs, Git

AI & Data: scikit-learn, PyTorch, Pandas, SQL, SAS Viya, KNIME, OCR, LLM workflows, feature engineering, model evaluation

Cloud & MLOps: Docker, Google Cloud Run, Firebase/Firestore/Storage, Kubernetes, Snowflake, MLOps fundamentals

Applied Engineering: Authentication, accessibility, API integration, debugging, testing, data pipelines, human-in-the-loop workflows

SELECTED PROJECTS

AERIS - Cold-Chain Logistics Control Tower

React | Node.js | Firebase | Google Cloud Run | Docker | OCR | WhatsApp

- Built a centralised operations platform for outsourced drivers, customers and delivery jobs, with WhatsApp-integrated workflows for delays, location requests, job updates and customer notifications.
- Implemented OCR and AI-assisted document processing with Google Document AI, manager review and inventory extraction for SKU, quantity, batch and expiry fields, while retaining human-in-the-loop verification.
- Deployed the backend on Google Cloud Run with Firebase/Firestore/Storage, connecting driver updates, documents and manager review through REST APIs and cloud services.

CareSwap - Community Care Platform

React | Node.js | Tailwind CSS | Authentication | Accessibility

- Co-built a modular platform for intergenerational connection, learning and wellbeing; personally implemented secure sign-up/sign-in, session handling, user profiles and accessibility preferences.
- Developed the Aura Shop reward experience and focused on accessibility-first UI, security and clean state management within a multi-developer team.
- Contributed within a multi-developer architecture spanning SkillSwap, CarePedia, CareQuest, CareForum, SafetyHub, notifications and real-time chat, while keeping my account features modular and maintainable.

Resume Lens - AI Resume Reviewer

React | FastAPI | LLMs | Background Jobs | Career Guidance

- Built an AI-assisted resume analysis and career guidance application with structured review workflows, role matching and persistent advisor conversations.
- Designed reliability features around background analysis jobs, progress, recovery and model fallback behaviour for invalid structured outputs.
- Extended the product with persistent advisor conversations, career profile facts and career-plan actions so feedback could carry across multiple sessions instead of acting like a one-off checker.

Hermes Telegram Email Bot - Personal AI Email Assistant

Python | Hermes Agent | Telegram Bot API | Gmail IMAP | DeepSeek API | Cron

- Built an agent-based assistant that checks unread Gmail, extracts message metadata, categorises email priority and delivers concise summaries to Telegram on demand.
- Added scheduled twice-daily digests, automatic mark-as-read handling and Telegram user-ID allowlisting; used the project to learn agent harnesses, tool-calling, IMAP, cron delivery and secret hygiene.
- Used Gmail App Passwords, environment-based secrets and Telegram user-ID allowlisting to keep the learning project security-conscious while exploring agent orchestration end to end.

AWARDS & RECOGNITION

- National AI Singapore Olympiad 2026 - Bronze, Top 60 of 500+ participants.
- Dell InnovateDash 2026 - Finalist, APJ AI Innovation Hub.
- HACX 2025 - Top 5.
- Director's List - Nanyang Polytechnic, Academic Year 2025/26 Semester 2.

ADDITIONAL TECHNICAL WORK

- Applied ML Market Prediction - exploring feature engineering, model comparison and sentiment-aware signals across AMD, GOOGL, META, MSFT, NVDA and QQQ market data.
- KNIME Data Integration & Quality Coursework - combined regional Excel sources, applied cleaning and validation rules, investigated anomalies and produced visual analysis for reporting.

APPLIED LEARNING HIGHLIGHTS

- Machine Learning & Deep Learning - regression and classification, clustering, ensembles, cross-validation, leakage awareness, model evaluation and PyTorch foundations.
- Data Engineering & Analytics - ETL, data cleaning, SQL, Pandas, KNIME, SAS Viya, anomaly checks, visualisation and statistical reasoning.
- Cloud & MLOps - Docker, Kubernetes fundamentals, Cloud Run, Firebase, managed services, deployment workflows and production-minded model operations.
- Software Engineering - React, Node.js, FastAPI, .NET, REST APIs, authentication, accessibility, testing, Git collaboration and iterative debugging.

CERTIFICATIONS

All current credentials are listed below. Titles are linked to verification pages where available.

Advanced Git

DataCamp | Aug 2026

SnowPro Associate: Platform Certification

Snowflake | Apr 2026 - Apr 2028

Credential ID 180711620

Introduction to Kubernetes

DataCamp | Aug 2026

MLOps Fundamentals

DataCamp | Aug 2026

Generative AI Fundamentals

Databricks | Aug 2026

Credential ID 192380442

Basic Proficiency in KNIME Analytics Platform

KNIME | Apr 2026

Web Development Fundamentals

IBM | Jun 2025

Credential ID 835cf40a-64ce-447c-b24b-0933b0e09e9f

Dell InnovateDash 2026 Finalist

Dell Technologies | Mar 2026

Credential ID 177145935

AWS Cloud Quest: Cloud Practitioner

Amazon Web Services | Sep 2026

Credential ID 8731acb6-b03a-499d-b562-5eac4fd96dfe

AI Agents Fundamentals

Hugging Face | Sep 2026

Credential ID kc67

Introduction to Docker

DataCamp | Aug 2026

End-to-End Machine Learning

DataCamp | Aug 2026

AI4I® - Literacy in AI

AI Singapore | Apr 2026

Credential ID 740716

PCEP™ - Certified Entry-Level Python Programmer

OpenEDG Python Institute | Oct 2025

Credential ID 488d3dc0-42a5-4ede-8a93-587316cee4fa

User Experience Design Fundamentals

IBM | Jun 2025

Credential ID 4e24ea5e-a4cb-4b9d-ab5f-860e1bc7e268

AI Fluency Framework & Foundations

Anthropic | Nov 2025

Credential ID ttg7bosgyp49
