PROFILE

Applied AI & Analytics student at Nanyang Polytechnic with hands-on experience building AI-assisted, cloud-deployed and full-stack systems. Strongest in Python, React, Node.js, cloud services, OCR workflows and practical ML. Seeking a one-year internship where I can contribute to real systems while deepening my engineering and MLOps skills.

EDUCATION

Nanyang Polytechnic - Diploma in Applied AI & Analytics

2025 - Present

- Director's List, Academic Year 2025/26 Semester 2, for outstanding academic performance.
- Coursework and projects across machine learning, deep learning, analytics, software engineering, databases, cloud deployment and MLOps.

TECHNICAL SKILLS

Programming & Web	Python, JavaScript, React, Node.js, FastAPI, .NET, Tailwind CSS, REST APIs
AI & Data	scikit-learn, PyTorch, Pandas, SQL, SAS Viya, KNIME, OCR, LLM workflows, feature engineering, model evaluation
Cloud & MLOps	Docker, Google Cloud Run, Firebase/Firestore/Storage, Kubernetes fundamentals, Snowflake, Git, deployment workflows
Engineering	Authentication, accessibility, API integration, testing, debugging, data pipelines, human-in-the-loop workflows

SELECTED PROJECTS

AERIS - Cold-Chain Logistics Control Tower

React | Node.js | Firebase | Google Cloud Run | Docker | OCR | WhatsApp

- Built a centralised control tower for outsourced cold-chain deliveries, combining job tracking, driver updates, customer notifications and manager review.
- Implemented WhatsApp workflows plus OCR and AI-assisted document processing, then deployed backend services on Google Cloud Run with Firebase, Firestore and Storage.

CareSwap - Community Care Platform

React | Node.js | Tailwind CSS | Authentication | Accessibility

- Co-built an intergenerational community platform; personally owned secure sign-up/sign-in, session handling, user profiles and accessibility settings.
- Developed the Aura Shop reward experience and integrated my account features into a broader multi-developer system with chat, notifications, scheduling and community modules.

Resume Lens - AI Resume Reviewer

React | FastAPI | LLMs | Background Jobs | Career Guidance

- Built AI-assisted resume analysis and career guidance with structured feedback, role matching, persistent advisor conversations and reusable career profile facts.
- Implemented background analysis jobs with progress, recovery and model fallback behaviour for longer LLM tasks.

Hermes Telegram Email Bot - Personal AI Email Assistant

Python | Hermes Agent | Telegram Bot API | Gmail IMAP | DeepSeek API | Cron

- Built an agent-based assistant that checks unread Gmail, ranks messages by priority and sends concise summaries to Telegram on demand.
- Added twice-daily digests, mark-as-read handling, user-ID allowlisting and secret-safe configuration while learning agent harnesses, IMAP and cron delivery.

AWARDS & RECOGNITION

- National AI Singapore Olympiad 2026 - Bronze, Top 60 of 500+ participants.
- Dell InnovateDash 2026 - Finalist, APJ AI Innovation Hub.
- HACX 2025 - Top 5.
- Director's List - Nanyang Polytechnic, Academic Year 2025/26 Semester 2.

ADDITIONAL TECHNICAL WORK

- Applied ML Market Prediction - explored feature engineering, model comparison and sentiment-aware signals across AMD, GOOGL, META, MSFT, NVDA and QQQ market data.
- KNIME Data Integration & Quality Coursework - combined regional Excel sources, applied cleaning and validation rules, investigated anomalies and produced visual analysis for reporting.

CERTIFICATIONS

Selected credentials are shown first, followed by the full set. Verification links are embedded where available.
